Dear Parents and Students,

ADVISORY ON VAPING

The Health Promotion Board (HPB) and Health Sciences Authority (HSA) would like to remind you of the following:

VAPING IS ILLEGAL, REGARDLESS OF AGE.

Under the Tobacco (Control of Advertisements and Sale) Act:

- It is an offence to purchase, use or possess e-cigarettes and/or their components. Offenders can be fined up to \$2,000.**
- It is also an offence to advertise, import, distribute, sell, offer for sale or possess for sale these products in Singapore. Offenders can be fined up to \$20,000 or face imprisonment of up to 12 months or both.**

Disciplinary actions will be taken against anyone caught for the above offences. Refer to Annex for more information on the penalties imposed on the offences.

VAPING IS HARMFUL AND CAN BE A GATEWAY TO CIGARETTE SMOKING.

Vaping, just like smoking cigarettes, is harmful and can lead to lifelong addiction. E-cigarettes contain many harmful substances such as nicotine. These substances can negatively impact brain development, especially to parts of the brain that control attention, learning and memory. E-cigarettes also contain benzene and formaldehyde which can cause cancer and infertility. Studies have also shown that individuals who vape are more likely to pick up cigarette smoking later in life¹.

If you know of someone who vapes or owns an e-cigarette, please inform the school so that timely cessation support can be offered to them. Alternatively, please call QuitLine at 1800 438 2000 for vaping/smoking cessation support.

Cyber Wellness @ Damai – Cyber Security

As the year-end holiday approaches, many children will be more spending time on the internet. Hence, the risk of them accessing inappropriate contents that are unsafe, violent, or inappropriate for their age will also greatly increase. In addition, children will also be prone to excessive screentime and increased exposure to online risks. To protect them from such dangers, we recommend that your child/ward pays special attention to the following;

Create a strong password

Educating our children to create a strong password is one of the ways to prevent hackers from accessing your child's email and retrieving their information for malicious intents.

- At least 12 characters long but 14 or more is better.
- A combination of uppercase letters, lowercase letters, numbers, and symbols (*,@,<,#).

Potential online risks

Many parents already have a good understanding of your children's online activities, yet many children do not recognise the importance of sharing their online activities with us. Hence, it is important for parents to be aware of potential online risks that may affect our children physically and/or emotionally.

- Receiving hateful and hurtful online comments
- Chatting and meeting with online strangers
- Exposure to inappropriate online content

Excessive screen time

Research is uncovering evidence that excessive screen time impairs learning, causes physical problems, and also leads to mental health disorders. Some of these problems includes;

- Posture and body aches
- Eye and vision-related problems
- Mental health issues
